Comment or Question:

I fully support alternative 3- replacement with light rail.

I also feel we need to incent the committies involved to get on with it. It seems as if some studies and committies are incented to belabor the issue. Let's follow the model CA used in replacing the SF bay bridge.

To the 3 Metro board members who dont want to replace the bridge yet for whatever excuse- I would like a refund from them of all those OR state taxes I paid when working over there & living in WA, since the roads are the only state (& federal)funded service I use over there. Its been taxation without representation of the WA commuters and a revolt is over due.

THANK YOU
