Comments:

Do Nothing but use the Portland proposed Toll to Build Supplemental Light rail and Seismically retrofit existing bridges. With increasing oil costs it makes sense to provide alternative transport which does not directly use fossil fuels. This also helps reduce carbon emissions in line with the carbon reduction laws recently passed by Washington Legislature.

Ideally Light rail should cross at IS to, perhaps, Mill plain, then run east to the I205 Bridge to cross back and connect at the airport, thus serving the entire community. Along Mill plain there are various spots that might serve as park + rides, such as a stacked parking structure on land adjacent to the library, or at the Tower Mall, etc.

1. WHICH BRIDGE OPTION DO YOU SUPPORT? (please check any that you would support)

- Replace the existing bridges
- Supplement the existing bridges with a new structure
- Do nothing—make no changes to the existing bridges
- No opinion

2. WHAT HIGH CAPACITY TRANSIT MODE DO YOU SUPPORT? (please check any that you would support)

- Bus rapid transit between Vancouver and Portland
- Light rail between Vancouver and Portland
- Do not add high capacity transit between Vancouver and Portland
- No opinion

3. WOULD YOU SUPPORT BRINGING BUS RAPID TRANSIT OR LIGHT RAIL TO THE FOLLOWING LOCATIONS? (please check any that you would support)
