---

I see the back up each day when I watch the news. It is hard on family and commerce who drive this outdated roadway each day.

With the amount of Federal Money we can get for this project, it is only the right thing to do and help our economy grow, and get this bridge built soon.

That is why I work in Washington, since the back up each day takes too much fuel and time, to be efficient.

Sincerely.

Mark Rogen, Live in Washington but shop in Oregon when the traffic is not bad.

Usually after 10PM each night.
