To whom it may concern.

I have read all the negative reaction to the new bridge plan in the news.

To counter the loud negative voices, I support the new bridge plan with light rail.

We are a part of the Portland Metropolitan region. The region is using light rail, why would we do anything else other than extend the chosen system north into Clark county?

I would love to see a west trunk of light rail from Ridgefield all the way down to Expo and I'd like to see an east trunk from Battle Ground down to the Airport. In addition I would like to see us use existing rail corridors for commuter rail such as we see in the NE corridor or in Chicago.

Keep up the good work.

Regards,

Jeanine Hill
