Comment or Question:

I oppose the preferred plan. 1) Building a new bridge will only encourage more drivers. 2) A rail bridge already exists for light rail. 3) The main reason for I-5 back-ups is Portland's Delta Park squeeze, NOT the bridge. 4) There is no place on Main Street or Broadway in Vancouver for light rail, no rational place, that is. 5) Better mass transit is what's needed, not a new bridge.
