Columbia River Crossing

ODOT
 HEADQUARTERS

Dear Chair Gail Achterman,

I am writing to urge you to take an important step in the drive to stop global warming and drop the Columbia River Crossing.

The Columbia River Crossing, a massive 12-lane bridge, accelerates the problem of global warming. Its \$4.2 billion cost would exhaust Oregon's capacity to fund alternative transit projects for a decade.

If we are to reach our climate-change goals, we must encourage people to get out of their cars and make cooler transit choices. The Columbia River Crossing will only increase traffic, boost global-warming emissions and force much tougher choices down the road. I urge you to stop it. Please tell me how you intend to address this issue.

Sincerely,

Wally & Son Automotive
 Katie Freeman
