Since the Columbia River Crossing Project Draft Environmental Impact Statement (DEIS) public comment period ends July 1st...we'd like to comment on the importance of a new bridge and encourage efforts to make the project a reality...

Freight mobility, navigation, safety, the movement of good and services AND people is critical to our ability to compete in a global economy. The longer we wait, the more costly the project becomes – not only to construct but in time delays of getting goods to market and people to jobs.

Please go for it!

Thanks,
Deb & Dwayne Garrett
