Address:

,

Comments:

Visual aesthetics are an extremely important part of the environmental impact. The look of the bridge and its approach elevation and shadow on nearby enterprises will

demonstrate how we as a community feel about living and working here.

It also has a quantifiable economic impact--as proven by real estate prices on those units with views of the nearby St. Johns Bridge. If we could afford to create a work of art in the 1930s to span a river we love, we can afford to do so in 2010.

Please put a value on the heart. Allocate money for good, pleasing design.
