## Comment or Question:

Tolling should absolutely be part of any bridge replacement plan. Tolls are the perfect user fee for this type of project in lieu of increasing gas taxes, and have been used for the better half of a century for just this purpose. I also believe that it will be necessary to toll I-205 to avoid the mass exodus to that crossing after tolls are put into place on I-5. My family would be willing to spend up to \$2.50 one way to cross either bridge. I believe that variable tolling should be implemented as well, or specials accommodations made for low income households.
