Comments:

I would like to see light rail come to Vancouver. That would be my preferred mode of

travel to work in the Rose Quarter area. I would also like the light rail to have a station at the Clark County park and ride. If I had to ride a bus from my home (or park and ride) to a light rail station, I would probably drive instead. I support the replacement bridge option as being best for relieving long-term congestion, providing the best option for river traffic, and having the least amount of impact (and potential improvement) to the marine habitat. Plus it would be best able to support a significant increase in rail traffic needing to offload until trucks in the area.
