Section: 2.2 Alternatives
Page: 2-5

Comment or Question:

Comment: Alternatives 2 and 3 are the only ones that make sense. I like re-using things, but the bridges are old and will only need more and more maintenance if they are not replaced. Also, we really need to address traffic and mass transit equally - this is, after all, an interstate. Light-rail would make more sense than the bus, only because it already goes to EXPO. It would be silly to have to transfer.

Question: Would there be tolls to get to and from the island (Hayden Bay?)
