Comment on new 1-5 bridge;

As a citizen who uses this bridge daily I do not wish to see one penny spent until Oregon addresses the road situation from Jansen Beach through Delta Park.

What possible good can a second bridge do when traffic has no where to go on the Oregon side? The problem is not on the Washington side, it is a Oregon State lack of planning issue. Oregon has the issue with traffic congestion. Washington traffic flows well with the exception of afternoons at the 205 exits to Mill Plain.

NO new bridge at the 1-5 location, no tolls, no sale of American bridges to foreign nations who charge tolls.

Respectfully,
