

ALTERNATIVE 5: Supplemental Crossing with Light Rail

Alternative 5 is similar to Alternative 4 except that light rail would be used instead of bus rapid transit. Light rail would have the same possible alignments and station locations. Compared to Alternative 3, trains would operate more frequently to increase the capacity of the transit system in order to compensate for the lower capacity of the supplemental crossing compared to the replacement crossing.

Supplemental River Crossing with Light Rail

Please see page 2-19 for a definition of Auxiliary Lanes. MEASUREMENTS PROVIDED ARE APPROXIMATE.
