Comment or Question:

P-0406-001 | I would like to strongly advocate for one of the options with an adequate (20ft) bicycle/
pedestrian lane.

P-0406-001

The northbound (eastern) bridge would accommodate an approximately 16 to 20 foot wide bicycle and pedestrian path, located within the support structure under the highway deck. The width of the path will depend on the width of the support structure itself. Chapter 2 of the FEIS offers further information about this multi-use path.
