The NEPA Process was not followed

P-069-001

Please do not approve this project. Here are fundamental reasons why it should be rejected:

The NEPA process requires that the FEIS approval process is to include public testimony and allow the public to have a voice in the process. The public was not allowed to have a voice in that process at the Vancouver City Council meeting or at the C-Tran meeting where the board members voted to give their final approval to this project.

It would be irresponsible to move forward with this project with such glaring red flags.

P-069-001

The National Environmental Policy Act (NEPA) and its regulations do not require a public hearing on a Final EIS (FEIS). Comments on the FEIS were accepted for more than 30 days following its availability and four public meetings were held during that period to provide opportunities for the public to comment and ask questions.

Any concerns about procedures at C-TRAN Board meetings or City of Vancouver Council meetings should be addressed with those agencies.
