Mr. Henry Hewitt
900 SW 5th Avenue, Suite 2600
Portland, OR 97204

RE: Columbia River Crossing Project Final Environmental Impact Statement

Dear Mr. Hewitt:

The Columbia River Crossing (CRC), on behalf of the Federal Highway Administration and the Federal Transit Administration, will publish its Final Environmental Impact Statement (EIS) September 23, 2011. This milestone brings the project closer to completing the planning phase required by the National Environmental Policy Act (NEPA). Enclosed is your copy of the Final EIS and Executive Summary. The Project Sponsors Council has and continues to play an essential role to move CRC through this phase of project development. I wish to personally thank you for the countless hours you dedicated to this important project.

This document is the culmination of years of planning and design discussions with project sponsors, stakeholders and the public. It builds on analyses included in the Draft EIS published in 2008, comments on the DEIS and public input received at more than 950 community briefings, workshops and public meetings. Additional information about the Final EIS and ways the public can view the document can be found on the project website at www.columbiarivercrossing.org.

There is a 30-day review period for the Final EIS that concludes Oct. 24, 2011. It is anticipated that the federal oversight agencies, Federal Highway Administration and Federal Transit Administration, will select an alternative and sign a record of decision in late 2011. The record of decision signals the conclusion of the NEPA process. CRC will then continue to develop the design for the project, including additional detail on project phasing, construction staging and construction techniques.

Thank you for your participation in the process to date and we look forward to working closely with you to complete this phase. If you have any questions or would like more information, please feel free to contact me at 866-396-2726, or via e-mail at boydn@columbiarivercrossing.org. Thank you for your continued support for this project.

Sincerely,

Nancy Boyd
CRC Project Director
