Hi Nikki.

I'll have the RAM form for these items turned in to you soon. Thanks.

Subject: Acceptance of Materials

Good Morning Vernon,

I was looking through some of the shop drawings you sent in and I notice materials that will be used are on the ROM, for instance:

Air Supply Manifold Shop Drawing

- Gate valve
- Ball valve
- Flow Meter
- Pressure Gauges

Bubble Curtain Ring Shop Drawing

- Aluminum pipe
- Telescoping Arm, assembly, guide

Just a reminder, please submit a RAM or QPL for all material and or equipment prior to use so I can send off for approval. Since this project consists of temporary materials, some items/manufacture's are not listed on the QPL and must be sent to Olympia for review.

Please refer to the ROM for document requirements.

Thanks,
Nicki
