Subject: C8078 - Welding pile splices/shoes

Kyle,

As we discussed earlier today, it is understood that WSDOT fabrication inspectors *do not* need to be present for the splicing welds on the piles or shoes for this project. The pile splicing weld is being performed by Crazan & Associates at the Farwest Fabrication facility in Puyallup, Washington. Crazan is performing UT on all weld splices. The shoe welding is being done by Farwest employee Shannon Tomeck certification number 88050191. If you see anything that is different than what we discussed please correct or add as you need. Thank you for your assistance with this matter.
