I-0454-001

We need to plan for the future and build an 8-lane replacement for 520. Why waster billions of dollars on a 4 or 6 lane option when the day it is finished, it will be congested? The 8 lane option rated higher on your opinion polls than the 4 lane option, so why are you focusing on the 4 and 6 lane options and ignoring the 8 lane option? Anyone who act! ually uses the 520 bridge would most certainly realize the need for an 8 lane option.
