**I-0993-001** | I have attended several meetings about the proposed improvements to SR 520, and I appreciate the great amount of work that people have done to get to this point. I feel that of the already known plans, the Pacific Interchange seems the closest to good except for the fact that is too wide and too tall.

**I-0993-002** | I've also seen a couple of plans that really should be under consideration: the Tube/Tunnel plan, and the Arboretum By-Pass Plan. I know that a sort of version of the Tube/Tunnel plan was evaluated, but the feasibility of the plan is still not known because the plan submitted was just a simple idea, not an actual design.

Although so much work has been done already, this is such a huge and permanent endeavor that I hope more time will be allowed for further consideration.

Thank you,  
Carol Simon, Secretary, Madison Park Community Council
