Comments:

I-1139-001 | I support NONE of the current 520 Bridge Options. The state could save tremendous ammounts of money if they were to incorporate light rail into this project, rather than doing two separate projects on two separate bridges. None of the current 520 alternatives will do anything to improve traffic long term. Light Rail will. There absoulutely must be a light rail line on the bridge to provide adequate transportation flow for the future.

I-1139-001

Comment Summary:

Light Rail Transit

Response:

See Section 2.2 of the 2006 Draft EIS Comment Response Report.
