Comments:

I-1213-001

Pacific Inter-change and six lane fosters too much concrete and doesn't sacrifice enough in changing for the future. Four lanes is sufficient and best, Transit, HOV lanes, tolls are over-all cost effect - economically feasible and environmetaly sound solution to incorporating improved technology in both futuristic transportation concepts suited for our re! gion.

I-1213-001

Comment Summary:

4-Lane Alternative

Response:

See Section 1.2 of the 2006 Draft EIS Comment Response Report.
