**Comment:**

The "Pacific Interchange" option for improving SR520 is the only option worth pursuing. After reviewing the detriment that the "Base Six" option would incur on neighborhoods, estuaries, and commuters, it is clear that the alternative must be approved for construction. The "Pacific Interchange" option would re-capitate the Montlake neighborhood, ease congestion along Montlake Blvd., and dramatically improve a disabled interchange. The University of Washington must be called to account for their success - they are the principle cause of the congestion north of the Montlake Cut, and Dean Emmert would benefit immeasurably by allowing this plan to go forward.

Best Regards,  
James Whitson
