Comment:

I see no point in rebuilding what we have. The transportation needs have changed since the original bridge was built. The high end option, involving the University area will have too much an impact on an area already inundated with traffic. Ultimately one has to keep in mind that it is the north/south interstate roads that limit the free flow of traffic on the bridge and that is not going to change. I think the 6 lane option with no Montlake interchange is the best of what has been offered. Ann Slutsky Laurelhurst prisoner
