Subject: Comments regarding 520 Bridge Replacement

I-071-001

Please consider any option retaining the 520 freeway stop. The new transit center is an extremely short distance away from the bus stop. People are capable of walking and re-routing all buses off the freeway and into traffic is both unnecessary and wasteful.

## I-071-001

The Montlake Freeway Transit Station stops were removed in all of the design options considered in the SDEIS, based on a decision making process that was part of Westside mediation. The mediation process was mandated by Engrossed Substitute Senate Bill 6099 and is described on pages 1-17 through 1-19 of the SDEIS. The mediation workgroup consisted of members from adjacent neighborhoods, transit agencies, jurisdictions, and State agencies. Removing the Montlake Freeway Transit Station would minimize the width of the freeway through the Montlake area, reducing the width by up to 40 feet compared to keeping the station. The mediation workgroup did not recommend any design options that included the Montlake Freeway Transit Station stops. See Attachment 8 to the SDEIS, Range of Alternatives and Options Evaluated, for further discussion of how and why removal of the stops was considered.

The Preferred Alternative includes removal of the Montlake Freeway Transit Station stops; however, it also includes a modified Montlake Boulevard interchange and lid. Modifications include a full lid from Montlake Boulevard to the Lake Washington shoreline, and bus stops on the lid for both eastbound and westbound buses (see Chapter 2 of the Final EIS for a description of the Preferred Alternative). The intent is to provide greater pedestrian amenity in the central part of the Montlake neighborhood while simultaneously providing a better location and environment for the regional bus stops incorporated in the transit/HOV direct access ramps (see Chapter 2 of the Final EIS). At the option of the transit agencies, SR 520 buses will be able to exit at the Montlake interchange during the off-peak periods to service passengers to/from the Montlake lid transit stop. University Link light-rail service, expected to be operational in 2016, will accommodate some of the trips that now use the bus stops. Chapter 8 of the Final Transportation Discipline Report (Attachment 7 to the Final EIS) provides further discussion of expected transit operations with the Preferred Alternative, including expected transit travel times, rider connections, and how future transit would

incorporate service currently provided at the stops.
