

SR 520, I-5 to Medina: Supplemental Draft EIS Comment Form

Please use this form to share your comments on the content provided in the Supplemental Draft Environmental Impact Statement document. WSDOT will consider all comments received between Jan. 22 and April 15, 2010 in making its final decision in the environmental review process. Thank you for your comments.

You can provide comments using one of the following methods:

- Complete this form.
- Mail your comments to Jenifer Young, SDEIS Environmental Manager, Washington State Department of Transportation, 600 Stewart Street, Suite 520, Seattle, WA 98101.
- E-mail your comments to SR520Bridge_SDEIS@wsdot.wa.gov.
- Speak to a court reporter at an environmental hearing scheduled for 5 – 7 p.m., Feb. 23, at Lake Union Park Naval Reserve Building, 860 Terry Ave. N., Seattle.

1. Name Justin Hellier

2. E-mail

3. Address:

4. City: Seattle

5. State: WA

* 6. Zip Code: 98105

7. Do you have any comments on the SR 520, I-5 to Medina: Bridge Replacement and HOV Project Supplemental Draft Environmental Impact Statement?

I-146-001

I believe strongly that TRANSIT must be the focus of our future investments in transportation.

While the bridge must be replaced, we should be doing so in a way that allows and encourages the use of light rail, not additional lanes for single occupancy vehicles.

I urge you to dedicate space on the new bridge to light rail now, in the design stage.

These comments will become part of the public record for the SR 520, I-5 to Medina: Bridge Replacement and HOV Project Supplemental Draft Environmental Impact Statement. Personal information is voluntary and will become part of the public record if provided. The Washington State Department of Transportation is a public agency and is subject to the State of Washington's Public Records Act (RCW 42.56). Therefore, comments may be made available to anyone requesting them for non-commercial purposes.

I-146-001

The SR 520, I-5 to Medina project would complete the HOV lane system in the corridor, improving reliability and efficiency for transit and carpools, but would not add general-purpose lanes. Thus, the project is aligned with improving the overall efficiency of the transportation system by creating incentives for people to choose an alternative to driving alone.

The SR 520 High-Capacity Transit Plan, which was endorsed in 2008 by the state, King County Metro Transit, and Sound Transit, found that until at least 2030, demand for transit in the 520 corridor could be satisfied by bus rapid transit that runs in HOV/transit lanes—complementing Sound Transit's East Link on I-90. At the same time, the plan acknowledges that after 2030 significant increases in cross-lake travel may warrant dedicated HCT facilities in both I-90 and SR 520. Therefore, the new SR 520 bridge and associated interchanges will be built in a way that allows the structure to accommodate a two-way light rail line or busway at a future date.

Section 2.4 in the Final EIS explains why initial implementation of light rail transit on SR 520 is not planned. However, while WSDOT believed that the design of the SR 520, I-5 to Medina project already accommodated potential future light rail, the agency worked with the City of Seattle and Sound Transit to identify changes that would enhance the corridor's rail compatibility. The Preferred Alternative reflects these design changes and allows for two potential future rail options as discussed in Chapter 2 of the Final EIS.
