

**SR 520, I-5 to Medina: Supplemental Draft EIS Comment Form**

Please use this form to share your comments on the content provided in the Supplemental Draft Environmental Impact Statement document. WSDOT will consider all comments received between Jan. 22 and April 15, 2010 in making its final decision in the environmental review process. Thank you for your comments.

You can provide comments using one of the following methods:

- Complete this form.
- Mail your comments to Jenifer Young, SDEIS Environmental Manager, Washington State Department of Transportation, 600 Stewart Street, Suite 520, Seattle, WA 98101.
- E-mail your comments to SR520Bridge\_SDEIS@wsdot.wa.gov.
- Speak to a court reporter at an environmental hearing scheduled for 5 – 7 p.m., Feb. 23, at Lake Union Park Naval Reserve Building, 860 Terry Ave. N., Seattle.

**7. Do you have any comments on the SR 520, I-5 to Medina: Bridge Replacement and HOV Project Supplemental Draft Environmental Impact Statement?**

**I-185-001**

while I would prefer the 8 lane concept, this project needs to get started so don't hold it up any longer.

These comments will become part of the public record for the SR 520, I-5 to Medina: Bridge Replacement and HOV Project Supplemental Draft Environmental Impact Statement. Personal information is voluntary and will become part of the public record if provided. The Washington State Department of Transportation is a public agency and is subject to the State of Washington's Public Records Act (RCW 42.56). Therefore, comments may be made available to anyone requesting them for non-commercial purposes.

**I-185-001**

An 8-lane alternative was among the original SR 520 roadway configurations advanced by the Trans-lake Washington Study Committee in 1999 for further study, and WSDOT evaluated an 8-lane alternative several times from 2002 to 2005 during the planning and development phases of the Draft EIS. An 8-lane alternative was dropped from further evaluation because choke points at the I-5 and I-405 interchanges and traffic volumes in those corridors would limit how many people could move through the SR 520 corridor and how fast they could travel; it would carry about the same number of people as the 6-lane Alternative, but many more of them would be in single-occupant vehicles, which is contrary to regional and local policies encouraging greater use of transit and HOVs; and substantial rebuilding of portions of I-5 and I-405 would be needed to make the 8-lane Alternative work. Such rebuilding would likely affect numerous residential and commercial buildings in downtown Seattle, and would also require reconstruction of the SR 520/I-405 interchange. See Attachment 8 of the SDEIS for further discussion.

Since the SDEIS was published, FHWA and WSDOT have identified a Preferred Alternative, which is similar to Option A but with a number of design refinements to address community and stakeholder concerns. Please see Section 1.9 of the Final EIS for a discussion of when the project would be built, and Chapter 2 for a description of the Preferred Alternative.
