Subject: Keep the Viaduct

Rebuild the Viaduct. The other options are much too costly and disruptive.

I am one of the many thousands who both rely on the viaduct and appreciate the chance to see the view.

I also rely on the parking underneath the viaduct. It will have to be replaced if any other option is chosen.

Thank you

FHWA, WSDOT, and the City of Seattle appreciate receiving your comments on the Rebuild Alternative. After studying several retrofitting concepts, the lead agencies found that rebuilding the viaduct would not be a cost-effective, long-term solution that adequately addresses the risks to public safety and the weakened state of the viaduct. Elements of the Rebuild and Aerial Alternatives were incorporated into the Elevated Structure Alternative, which was analyzed in the 2006 Supplemental Draft EIS and the Final EIS. Because the project has evolved since comments were submitted in 2004, please refer to the Final EIS for current information.
