Project Comments:

I have reviewed all of the options and feel this is the best option for addressing the traffic volumes. Additionally, the "Sound view" from the raised highway is a part of Seattle's unique skyline.

Comments apply to:
Aerial Alternative

FHWA, WSDOT, and the City of Seattle appreciate receiving your comments on the Aerial Alternative. Elements of the Rebuild and Aerial Alternatives were incorporated into the Elevated Structure Alternative to meet today's safety standards while minimizing the effects of a wider structure. This alternative was analyzed in the 2006 Supplemental Draft EIS, and the design was refined in the Final EIS. Because the project has evolved since comments were submitted in 2004, please refer to the Final EIS for current information.
