Subject: viaduct opinion

Hello,

I was unable to make it to a public hearing on April 27 or 29 but would like to mention that I favor reconstruction of the present structure for the viaduct. I use the viaduct about once a month for transport to the airport and I like the view as I ride to the airport and feel it is a chance for almost anyone to see the great view of the sound instead of just from some businesses or private residences downtown. I am used to the viaduct as it is and would not be interested in paying more money to have a tunnel.

Thanks,

Kristina Peterson 206 418-1335

FHWA, WSDOT, and the City of Seattle appreciate receiving your comments on the Rebuild Alternative. After studying several retrofitting concepts, the lead agencies found that rebuilding the viaduct would not be a cost-effective, long-term solution that adequately addresses the risks to public safety and the weakened state of the viaduct. Elements of the Rebuild and Aerial Alternatives were incorporated into the Elevated Structure Alternative, which was analyzed in the 2006 Supplemental Draft EIS and the Final EIS. Because the project has evolved since comments were submitted in 2004, please refer to the Final EIS for current information.
