Comment:

It's important that the state have a neutral engineering firm who has "tube" expertise, do a real feasibility study of the tube/tunnel alternative before we make any decisions on the SR-520 replacement.

If the tube/tunnel is feasible, and if it doesn't put an exit into the arboretum area, it is by far the best solution to air, water, visual and noise pollution on the western end of the 520 project.
