**Comment:**

As a Laurelhurst resident, I strongly support the Pacific Street Interchange option for the sr520 bridge improvement, primarily because it is the only solution offered that addresses the significant traffic problems on 25th NE to the Montlake bridge. In doing so, this option also provides the best possibility for increased transit usage along 25th NE (either Metro or Sound Transit, or both), affording the opportunity of increased ridership.

I strongly encourage limiting the height of the Union Bay Bridge associated with this option to 70 feet, and I am opposed to a 110 foot structure.

Finally, I encourage the use of noise-reducing techniques to the extent possible in the final plan.

Thank you,  
Mark Revere
