Comments:

I-1185-001

Road construction should be limited to 4 lanes. High Capacity Transit should be the highest priority. The funds for the project should include development of Light Rail connection to University of Washington. State funding for transportation projects at this scale should create transit that will operate with reduced energy consumption, congestion and loss of productivity to due transportation delays.

I-1185-001

Comment Summary:

Light Rail Transit

Response:

See Section 2.2 of the 2006 Draft EIS Comment Response Report.
