**Comment:**

There is a viable alternative to which I do not believe WSDOT has given fair, objective, unbiased consideration: this alternative is known as the Pacific Interchange. This alternative absolutely must be considered and investigated. Yes, a relationship from and support of the UW will be necessary but this support can be forthcoming if only WSDOT staff and management will exhibit leadership.

Please do not keep your blinders on to building only more traffic lanes. To do so will only be a disservice to the citizens of our state.
