Comment:

I favor a 6 lane alternative, possibly with 8 lanes on the bridge per se (per analysis by Jim MacIsaac). However, I am very concerned about the impact on the Arboretum. All reasonable measures should be taken to mitigate that impact, particularly in regard to noise pollution. For instance if the "Pacific Interchange" and approaches to the bridge from the east (Montlake) were tunneled, this would speak to that concern. A high-level viaduct appears to be the worst approach.
