Comment:

Watching the money spent to widen I-405, I find it insane to build a minimal 4-lane bridge. The current cost to provide for the future is minimal compared with the cost to retro-fit more capacity later. Even if only 4 lanes are used until I-5 can handle the traffic, it is still sensible.

To be clear: I am in favor of a 6-lane bridge with the Pacific street interchange. Even if only 4-lanes are used initially, I am still in favor of 6-lanes
