I support the Pacific Interchange plan because it will link up with the Sound Transit light rail station at the University of Washington and this is a vital connection for the region. In addition, the Pacific Interchange plan will reduce traffic on Montlake Blvd. and allow bus traffic to move through this corridor. I also like the fact that the Pacific Interchange plan will add park land by means of a lid connecting Portage Bay to Lake Union. The Pacific Interchange plan is a good plan, not just for the University and surrounding neighborhoods, but for the region as a whole. This is the best "big picture" plan. Thank you for the opportunity to comment.
