Communication: I am curious as to whether or not the 520 bridge replacement program scope includes lane expansion on the west side of Lake Washington? On your web site there is talk of expansion on the east side (though it is 3 lanes already right up until the bridge) but no talk about the west side. Is the plan for now to increase the bridge to 3 lanes but bottleneck the west side down to 2 lanes?

I am sure this isn't the plan because you wouldn't spend \$5 billion to create a bottleneck but I can't seem to find information on west side expansion. Thank you.
