Subject: 520 Bridge Replacement

To Whom It May Concern;

My wife and I recently received a postcard notifying us about the comment period extension.

I-078-001

I have recently heard that Seattle Mayor McGinn is seeking to conduct yet another study and change the plan that has already been approved and is in process. So much time and taxpayer money has been spent and wasted on multiple studies over many years that this has become a farce. Those of us who commute everyday on this heavily overused and dangerously outdated bridge are more than tired of studies and delays. The time for building, not studies, has long past.

Respectfully,
George Myers
