

SR 520, I-5 to Medina: Supplemental Draft EIS Comment Form

Please use this form to share your comments on the content provided in the Supplemental Draft Environmental Impact Statement document. WSDOT will consider all comments received between Jan. 22 and April 15, 2010 in making its final decision in the environmental review process. Thank you for your comments.

You can provide comments using one of the following methods:

- Complete this form.
- Mail your comments to Jenifer Young, SDEIS Environmental Manager, Washington State Department of Transportation, 600 Stewart Street, Suite 520, Seattle, WA 98101.
- E-mail your comments to SR520Bridge_SDEIS@wsdot.wa.gov.
- Speak to a court reporter at an environmental hearing scheduled for 5 – 7 p.m., Feb. 23, at Lake Union Park Naval Reserve Building, 860 Terry Ave. N., Seattle.

7. Do you have any comments on the SR 520, I-5 to Medina: Bridge Replacement and HOV Project Supplemental Draft Environmental Impact Statement?

I-173-001
I-173-002

I would like to say that I am opposed to the most recent push to change the hov lanes to light rail only. This would just make the bridge more clogged up (and I am a very liberal, pro-light rail person!). I do think that the idea to add the bus stop at montlake is a good one, though. It doesn't make sense to get rid of that stop that is there already.

These comments will become part of the public record for the SR 520, I-5 to Medina: Bridge Replacement and HOV Project Supplemental Draft Environmental Impact Statement. Personal information is voluntary and will become part of the public record if provided. The Washington State Department of Transportation is a public agency and is subject to the State of Washington's Public Records Act (RCW 42.56). Therefore, comments may be made available to anyone requesting them for non-commercial purposes.

I-173-001

The proposal for the SR 520, I-5 to Medina project includes four general-purpose lanes and two HOV lanes. The project can accommodate future high capacity transit in the SR 520 corridor, which may include proposed bus rapid transit or potential future light rail transit.

The SR 520 High-Capacity Transit Plan, which was endorsed in 2008 by the state, King County Metro Transit, and Sound Transit, found that until at least 2030, demand for transit in the 520 corridor could be satisfied by bus rapid transit that runs in HOV/transit lanes, complementing Sound Transit's East Link on I-90. At the same time, the plan acknowledges that after 2030 significant increases in cross-lake travel may warrant dedicated HCT facilities in both I-90 and SR 520. Therefore, the new SR 520 bridge and associated interchanges will be built in a way that allows the structure to accommodate a two-way light rail line or busway at a future date.

Potential future light rail could be accommodated either by converting the HOV lanes for rail use or by adding light-rail only lanes. Under the SR 520 High Capacity Transit Plan, Sound Transit would study the demand and necessity of light rail later in this decade. For more information, please see Chapter 2 of the Final EIS, and the SR 520 High Capacity Transit Plan at:

I-173-002

The Montlake Freeway Transit Station stops were removed in all of the design options considered in the SDEIS, based on a decision making process that was part of Westside mediation. The mediation process was mandated by Engrossed Substitute Senate Bill 6099 and is described on pages 1-17 through 1-19 of the SDEIS. The mediation workgroup consisted of members from adjacent neighborhoods, transit agencies, jurisdictions, and State agencies. Removing the Montlake Freeway Transit Station would minimize the width of the freeway through the Montlake area, reducing the width by up to 40 feet compared to

keeping the station. The mediation workgroup did not recommend any design options that included the Montlake Freeway Transit Station stops. See Attachment 8 to the SDEIS, Range of Alternatives and Options Evaluated, for further discussion of how and why removal of the stops was considered.

The Preferred Alternative includes removal of the Montlake Freeway Transit Station stops; however, it also includes a modified Montlake Boulevard interchange and lid. Modifications include a full lid from Montlake Boulevard to the Lake Washington shoreline, and bus stops on the lid for both eastbound and westbound buses (see Chapter 2 of the Final EIS for a description of the Preferred Alternative). The intent is to provide greater pedestrian amenity in the central part of the Montlake neighborhood while simultaneously providing a better location and environment for the regional bus stops incorporated in the transit/HOV direct access ramps (see Chapter 2 of the Final EIS). At the option of the transit agencies, SR 520 buses will be able to exit at the Montlake interchange during the off-peak periods to service passengers to/from the Montlake lid transit stop. University Link light-rail service, expected to be operational in 2016, will accommodate some of the trips that now use the bus stops. Chapter 8 of the Final Transportation Discipline Report (Attachment 7 to the Final EIS) provides further discussion of expected transit operations with the Preferred Alternative, including expected transit travel times, rider connections, and how future transit would incorporate service currently provided at the stops.
