==== My Question/Comment/Complaint =====

I-200-001

What a shame that light rail planning is not mentioned in your 520 plan. You really ought to rethink what your doing. Your public officials and should do what's best for the public.

I-200-001

The SDEIS provided some discussion of high capacity transit, including design considerations for light rail (see page 2-29 of the SDEIS); however, Section 2.4 in the Final EIS explains why initial implementation of light rail transit on SR 520 is not planned and provides further discussion of high capacity transit in the corridor and how the SR 520, I-5 to Medina project can accommodate bus rapid transit and potential future light rail.
