Subject: Please add another exit for southbound 15

I-284-001

please add another exit on the right side to east bound 520. There is a congestion problem between NW 45 and the left exit to 520. People enter the freeway on the right and have to cross all the lanes to get to 520. If you give them a right hand exit it would stop and this crossover congestion. Traffic would move smoother in southbound I5

I-284-001

Improvements on I-5 are not included as part of the SR 520, I-5 to Medina: Bridge Replacement and HOV project. However, to help improve the connection between SR 520 and I-5, the SR 520, I-5 to Medina project includes a new reversible HOV ramp that will connect to the existing I-5 reversible express lanes south of SR 520. The project will not preclude future modifications to the SR 520/I-5 interchange.
