Comments: I think the tunnel is too expensive for seattle at this time, although I would like to see our waterfront opened up for PUBLIC use. I am suspicious that a tunnel will mainly serve developers & not the public at large. We need to fund public health clinics before we fund things like public buildings for yacht owners, stadiums & tunnels that serve developers.

FHWA, WSDOT, and the City of Seattle appreciate receiving your comments and recognize your concern for the high cost of the 2006 Cut-and-Cover Tunnel Alternative. The lead agencies have identified the Bored Tunnel Alternative as the Preferred Alternative. It would provide the City of Seattle with the opportunity to open up the waterfront for public use. The project would not change the City of Seattle zoning regulations that are required for any future development.
