Preferences for specific alternatives or options, as expressed in comments received before and after the issuance of the DEIS, were shared with local sponsor agencies to inform decision making. Following the close of the 60-day DEIS public comment period in July 2008, the CRC project's six local sponsor agencies selected a replacement I-5 bridge with light rail to Clark College as the project's Locally Preferred Alternative (LPA). These sponsor agencies, which include the Portland City Council, Vancouver City Council, TriMet Board, C-TRAN Board, Metro Council, RTC Board, considered the DEIS analysis, public comment, and a recommendation from the CRC Task Force when voting on the LPA.

With the LPA, new bridges will replace the existing Interstate Bridges to carry I-5 traffic, light rail, pedestrians and bicyclists across the Columbia River. Light rail will extend from the Expo Center MAX Station in Portland to a station and park and ride at Clark College in Vancouver. Pedestrians and bicyclists would travel along a wider and safer path than exists today.

For a more detailed description of highway, transit, and bicycle and pedestrian improvements associated with the LPA, see Chapter 2 of the FEIS.

## Comments:

**P-0144-002** | This project should have been completed years ago. What's the hold up? Also, extend  
**P-0144-003** | light rail to Salmon Creek, and build it across I-205 too! Start now, we can't wait another  
15 years.

**P-0144-002**

It is important that a project, such as CRC, provide ample opportunity for input from a diverse constituency of stakeholders and jurisdictions, and that it follow a process that complies with all federal, state and local legal requirements. The project sponsors intent is to progress at a deliberate pace to ensure that we meet public interests, meet the transportation needs, address the quality of local communities and the environment, and be financially and fiscally responsible. Following publication of the FEIS, there will be a record of decision. If that decision is to move forward with one of the build alternatives, then the sponsors will progress into final engineering, finance plan implementation, and then construction.

**P-0144-003**

The CRC Project is focused on providing a high-capacity transit option through downtown Vancouver to Clark College. RTC has completed a High-Capacity Transit System Study which recommends specific high-capacity transit improvements, including light rail, bus rapid transit and bus service improvements that will best serve Clark County residents in the mid-term (by 2030) and long-term (beyond 2030). To view their Final HCT System Study, visit RTC's website at [www.rtc.wa.gov](http://www.rtc.wa.gov). Though these recommendations are designed to connect with CRC transit improvements, they are not part of the CRC project.
