Comment or Question:

**P-0696-001**

As a regular bike commuter who enjoys my mode of transportation, i hope that at this late time in our history as auto enthusiasts, leaders would consider the public's interest beyond trucking and getting cars with 1 person occupancy over the Columbia as expeditiously as possible. At this point we need leadership as wise and brave as ever to look at the bigger picture and assist in reducing global climate change, congestion, and energy waste and increase the health of the planet. Please take the time to do what must be done to assist people in kicking the habit of oil and careless waste of resources.

**P-0696-001**

Thank you for your comment. The LPA includes light rail transit, bicycle and pedestrian improvements, a new toll on the I-5 crossing, and highway capacity and safety improvements. Please see analysis in the FEIS (Chapter 3) indicating that it would reduce the number of autos crossing the river, reduce congestion, and reduce greenhouse gas emissions.
