P-0756-001 Pls forward to the I-5 Bridge group, pls,
I'm a private pilot and have enjoyed Pearson as thousands others have. I'm sure
if the engineers take the time, they can come up with a design that satisfies the
new bridge without encroaching on Pearson, living history.
Thank you
Erik Schutten

**P-0756-001**

Thank you for taking the time to submit your comments on the I-5 CRC DEIS. We are refining a design that will have no right of way impacts on the airfield, nor will the new structure interfere with the flight paths for either the airfield or the Portland Airport.
